

**Site of second 3-T MRI scanner** - the bay for the second Skyra 3-T MRI scanner is now complete and the scanner is installed and operating.

**Whitehall Building** - 14,000 square feet, main site of Olin Neuropsychiatry Research Center, containing 3T scanner #1, electrophysiology lab and space for clinical assessment, faculty, postdoctoral fellows, image analyst and research assistants.

**Huntington Building** - Newly opened two-story building housing 7500 additional square feet of space for research assistants and fellows, and DNA repository.

**Butler Building** - 30-sec walk from the Olin center. The second-floor (~18,000 square feet) consists of space for research assistant offices, clinical interviewing space, psychopharmacologic dosing.

**IOL campus** - 35-acre campus landscaped by Frederick Law Olmsted is a two-minute walk from the Olin center. The Institute of Living's gracious campus is located just south of downtown Hartford and the state capital, and just a few blocks east of Trinity College. The Institute's campus is part of a larger medical complex that also includes Hartford Hospital and the Connecticut Children's Medical Center (CCMC).
